

Routine Vision services are supplemental benefits offered on many plans that cover additional routine vision services not covered under the Original Medicare benefit. The routine vision benefits, routine eye exams and eyewear, are offered in addition to medical benefits to better meet the needs of members.

What?

What does this benefit offer members?

- Routine Vision benefits add value because it saves members money to have these benefits included as part of their Medicare Advantage (MA) plan
- UnitedHealthcareVision has a robust network of vision providers
- Access to a comprehensive routine eye exam, which may identify other eye issues (i.e. glaucoma, eye disease related to diabetes, optic nerve damage)
- 2020 UnitedHealthcareVision benefit standardization:
 - \$0 copay for routine exam, every year
 - Eyewear materials covered every two years in network (some plans are annual):
 - Frame allowance of \$100-300, depending on the package selected
 - Lenses (single vision, bifocal or trifocal lenses, including progressives and scratch resistant coating) covered in full
 - If the member prefers contacts, the frame allowance can be applied toward the purchase of contacts instead
 - Includes lenses, fitting and evaluation
 - Formulary listed contact lens covers up to 8 boxes
 - Non-formulary contact lens quantity varies by selection
 - Medicare-covered eyewear following cataract surgery is also covered on all plans.
 - Post-cataract eyewear is a separate benefit from any routine eyewear benefits.

How?

How does the benefit work?

- We encourage members to call UnitedHealthcare Customer Service for assistance with questions about their routine vision benefits and to help locate a provider.
- To locate a provider:
 - UnitedHealthcare (UHC) Vision go to myuhcvision.com (direct URL to Medicare network is in process)
 - March Vision go to marchvisioncare.com
 - 20/20 EyeCare go to our2020.com
 - Nationwide and Icare - members should contact the UnitedHealthcare customer service for assistance
- The PDF provider directory, including routine vision providers, is also published online
- Once a provider is located, the member makes their appointment and brings their ID card for the office to verify eligibility and benefits.
